

Dear Patients,

It is time again for the annual flu vaccine, which I strongly recommend especially this year. This year most of the supply was bought out by public authorities and so far we pediatricians have no official confirmation how many doses we will get.

The vaccine is to be free of charge for all children aged 6 months through 15 years and for all Viennese residents.

For the sake of the children and also epidemiologic reasons I suggest that you either book an appointment for yourself at one of the vaccine centers:

<https://www.wien.gv.at/gesundheit/beratung-vorsorge/impfen/grippeimpfung.html>

Alternatively I can give you one of my own pharmacy supply for 35€ or administer one that you bring with you, for a vaccine charge of 15€.

As soon as the cooperation with the magistrate seems reliable, I will pass on the info via WhatsApp and you can cancel the appointment at the vaccine center.
